

MICHAEL E. MCGRATH

**President
Vehicle Service Market – North America
AB SKF**

Headquartered in Elgin, Illinois, Michael E. McGrath is currently president of the SKF Vehicle Service Market in North America. The SKF Vehicle Service Market is comprised of automotive and heavy duty segments serving multiple channels. The company's focus is primarily on the sales and marketing of replacement seals and bearings. McGrath also has responsibility for the main distribution center located in Hebron, Ky. This center provides logistical services in support of the company's other segments, which include the North American light duty and commercial vehicle aftermarket, and the OE service segment.

McGrath started his career by joining Ingersoll Rand as part of their young executive program. He held various management positions in materials management and distribution at both their Chicago, Illinois and Portland, Oregon operations.

In 1985, McGrath joined Stewart Warner Corporation and held various materials management positions until in 1988 when he was named director of material control for the company. In 1991, Mike was promoted to the position of director of aftermarket sales for Stewart Warner.

Mike joined Chicago Rawhide in 1993, then a division of SKF, as the field sales manager for the HD aftermarket group. He held various sales director positions in the automotive, commercial vehicle and industrial sales groups inside SKF until 2000 when he was named vice president of sales for SKF VSM North America.

McGrath was promoted to president of SKF's Vehicle Service Market North America in 2006. In this position, he has full P & L responsibility for this division.

Mike earned his BS in Marketing from the University of Illinois, Chicago, in 1982. He earned his MBA from DePaul University in 1989. He completed his APICS certification in 1984 and his Automotive Aftermarket Professional, AAP in 2002. Mike, his wife, Donna, and their three

children reside in Park Ridge, Illinois.
